

# Basfoliar® Black

0-0-2+7.5% Humic acid+7.6% Fulvic acid

EXPERTS FOR GROWTH

**Basfoliar® Black** improves the structure and water holding capacity of soil. **Basfoliar® Black** stimulates the development of beneficial **microorganisms** in the soil as its a rich source of **carbohydrates**.

**Basfoliar® Black** increases the ability of plants to deal with abiotic stress. The 7.5% Humic acid will help retain nutrient ions, thus preventing them from leaching while increasing germination rates and fibrous root development. The 7.6% Fulvic acid in **Basfoliar® Black** promotes carbohydrates and increases the accumulation of soluble sugars in the cell, which helps the plant to deal with drought stress. **Basfoliar® Black** is rich in organic substances essential for the healthy function of soil structure, soil-biology and turf.

**20L**

Pack size

**4 week** longevity

**Immediate**

turf response

**10-20L/ha** application rate

**300-600 L/ha**

Water volume

**Instant greening effect, fulvic acid absorbed into leaf**

**Enhance chlorophyll content increasing plant metabolism**

**Improves soil structure and water holding capacity**

**Improves CEC of soils**

**Increased availability of micronutrients**
