

Double Clean

A concentrated balanced liquid formulation tank cleaner containing sequestrants and surfactants.

Safety information

Causes serious eye damage.

Causes skin irritation.

DANGER

Wash thoroughly after use.

Wear protective gloves/protective clothing/eye protection/face protection.

IF ON SKIN: Wash with plenty of soap and water.

IF IN EYES: Rinse cautiously with water for several minutes.

Remove contact lenses, if present and easy to do. Continue rinsing.

Immediately call a POISON CENTER or doctor/physician.

If skin irritation occurs: Get medical advice/attention.

To avoid risks to human health and the environment, comply with the instructions for use.

GAC Double Clean

SAFETY PRECAUTIONS

Operator protection

WEAR SUITABLE GLOVES AND EYE/FACE PROTECTION.

IN CASE OF CONTACT WITH EYES, RINSE IMMEDIATELY WITH PLENTY OF WATER AND SEEK MEDICAL ADVICE.

WASH ANY CONTAMINATION FROM SKIN IMMEDIATELY.

WHEN USING DO NOT EAT, DRINK OR SMOKE.

IN CASE OF ACCIDENT OR IF YOU FEEL UNWELL, seek medical advice immediately (show label where possible).

Storage and disposal

KEEP AWAY FROM FOOD, DRINK AND ANIMAL FEEDING STUFFS.

KEEP OUT OF REACH OF CHILDREN.

KEEP IN ORIGINAL CONTAINER, tightly closed, in a safe place, away from damp.

EMPTY CONTAINER COMPLETELY and dispose of safely.

AVOID PROLONGED CONTACT OF CONCENTRATE WITH METAL SPRAYER PARTS.

Undiluted product is not to be used on aluminium alloys, zinc or galvanised surfaces.

KEEP FROM FREEZING.

GAC Double Clean is specially formulated to remove pesticide deposits and other debris, including oily substances, from tanks, hoses, booms, filters, screens and nozzles.

GAC Double Clean was developed to handle difficult to clean agricultural chemicals, including sulfonylurea herbicides, carfentrazone-ethyl and sticky formulations.

GENERAL INFORMATION

GAC Double Clean can be used to clean and decontaminate tanks, spray lines, transfer pumps, flushing or pre-mixing tanks. It should always be used when switching from one herbicide to another, or a herbicide to a fungicide, fertiliser or insecticide, and at the end of season sprayer clean up.

RATE OF USE

General Purpose Cleaning: Use 125 ml per 100 litres of tank capacity.

Decontamination and removal of residues of sulphanyl urea (Group B) and carfentrazone-ethyl (Group G) herbicides, combinations or sticky formulations: Use 250 ml per 100 litres of tank capacity.

Tank Size	100L	250L	500L	1000L	2000L
GAC Double Clean	0.25L	0.625 L	1.25L	2.5L	5L

DECONTAMINATION PROCEDURE

1. Immediately after spraying, completely drain tank, hoses and boom. Any contamination on the outside of spraying equipment should be removed by washing down with a fresh solution of GAC Double Clean and water (25 ml in 10 litres of water).
2. Rinse inside of tank clear of visible residues with clean water and flush through hoses and booms using at least 1/10 of tank spray volume. Drain tank completely.
3. Half fill the tank with clean water and add GAC Double Clean at the selected rate. Agitate and briefly flush the hoses and boom until the cleaning solution starts to come out through

all the nozzles. Then completely fill tank with water and allow to stand for 15 minutes with agitation running. Again flush the hoses and spray all of the solution out through the boom and drain the tank completely.

– NOTE: If it is not possible to drain the tank completely, repeat step 3 before going on to step 4.

– For very large sprayers with internal sprinklers it is not necessary to completely fill the tank. With agitation and sprinklers running ensure contact time between the cleaning solution and all internal tank surfaces of 15 to 30 minutes.

– For extra 'sticky' combinations allow the cleaning solution to 'sit' for 24 hours to increase residue removal. If it is suspected hoses and spray lines are contaminated increase cleaning solution contact time to 48 hours. Replace old and perished hoses.

4. Nozzles, screens and filters should be cleaned with a fresh solution of GAC Double Clean and water (25 ml in 10 litres of water).
5. Rinse the tank with clean water and flush through the hoses and boom. Drain the tank completely.
6. For the disposal of washings, follow the 'Code of Practice for using plant protection products' (DEFRA publications 2006) (UK only). Do not spray onto sensitive crop or land intended for imminent planting with sensitive crops.

CONDITIONS OF SUPPLY

Our products are high grade and we believe them suitable for use as directed, but as we cannot control their mixing, use or weather conditions during and after application, no condition or warranty is made as to their quality or fitness and no responsibility will be accepted for damage or injury arising either directly from their storage, handling or use. No liability shall be accepted for any loss or damage caused due to any person failing to use the product in accordance with the instructions for use. SAFETY DATA SHEET: A safety data sheet is available on request.
