

Florissant 500N Clear Water tablet

Florissant 500N is a universal post harvest treatment. Florissant 500N keeps the water in the bucket clean over a period of days allowing the flower to keep its maximum quality. Florissant 500N can be used throughout the whole supply chain from grower to flower shop.

Effects

- extends vase life
- keeps the water in the bucket clean
- prevents early wilting
- prevents bent-neck
- maintains leaf quality

For

Gerbera, Anthurium, Zantedeschia, Helianthus and many other flowers.

Usage

For an optimal result Florissant 500N should be used directly after cutting throughout the whole supply chain. For full instructions please contact us via button below.
