

820 Hydration Energy

Florissant 820 is a universal rehydration solution for flowers with a soft or woody stems. It lowers the pH which improves the water uptake and vase life. Recommended by the Dutch flower auctions as it keeps flowers and foliage in optimal condition. Use from grower to flower shop and all other steps in the chain.

Effect

- Increases vase life up to 25%
- Suitable for all water qualities and at low temperatures
- Lowers the pH of the water
- Free from aluminium sulphate
- Gives energy to the flower
- Improves colour

For

all cut flowers

Usage

Do not use in combination with steel, iron or zinc buckets or water pipes. Put freshly harvested flowers immediately on the solution for a minimum of 4 hours, there is no maximum treatment time. For full instructions please contact us via button below.
